BACHELOR OF SCIENCE (B.Sc.)

(THREE YEAR DEGREE COURSE)

SUBJECT

BOTANY
B.Sc. (BOTANY)

COURSE STRUCTURE

FIRST YEAR

PAPER – 101: Diversity of Viruses, Bacteria & Fungi 50 MARKS

PAPER – 102: Diversity of Algae, Lichens, & Bryophytes 50 MARKS

PAPER – 103: Diversity of Pteridophytes & Gymnosperms. 50 MARKS

PAPER – 104: PRACTICAL (Based on Paper 101, 102, 103) 50 MARKS

SECOND YEAR

PAPER – 201: Diversity of Angiosperms: Systematics, Development & Reproduction 50 MARKS

PAPER – 202: Cytology, Genetics, Evolution & Ecology 50 MARKS

PAPER – 203: Plant Physiology and Biochemistry 50 MARKS

PAPER – 204: PRACTICAL (Based on Paper 201, 202, 203) 50 MARKS
THIRD YEAR

PAPER – 301: Plant resource utilization, Palynology and Biostatistics 50 MARKS

PAPER – 302: Molecular biology & biotechnology 50 MARKS

PAPER – 303: Environment Botany and Plant Pathology 50 MARKS

PAPER – 304: PRACTICAL (Based on Paper 301, 302, 303) 50 MARKS
B.Sc. (BOTANY)
FIRST YEAR DETAILED SYALLBUS
PAPER – 101
Diversity of Viruses, Bacteria, & Fungi

(There will be 9 questions in each paper and candidate has to attempt only 5 questions. Q.1 will be compulsory based on units I - IV. Two questions will be set from each unit of which one question has to be attempted. All questions will carry equal marks.

Unit-I

History, nature and classification of Viruses, Bacteria and Fungi. History of virology and bacteriology; prokaryotic and eukaryotic cell structure (bacteria, mycoplasma and yeast); structure, classification and nature of viruses; structure (gram positive and gram negative) and classification (based on cell structure) of bacteria; classification, thallus organization and reproduction in fungi; economic importance of fungi.

Unit-II

Viruses: Symptoms of virus infection in plants; transmission of plant viruses; genome organisation, replication of plant virus (tobacco mosaic virus); techniques in plant viruses - purification, serology and electron microscopy; structure and multiplication of bacteriophages; structure and multiplication of viroids.

Unit-III

Bacteria: Nutritional types of bacteria (based on carbon and energy sources), metabolism in different nutritional types (basics only) and bacterial genome and plasmids; bacterial cell division, flagellation in bacteria - principles of genetic
recombination; techniques in sterilization, bacterial culture and staining; economic importance.

**Unit-IV**

**Fungi:** The characteristics and life cycles of the following:
- **Mastigomycotina:** Albugo
- **Zygomycotina:** Mucor
- **Ascomycotina:** Saccharomyces, Aspergillus
- **Basidiomycotina:** Ustilago, Puccinia, Agaricus
- **Deuteromycotina:** Alternaria.
Unit-I

General characters. Range of thallus organization, classification, ultrastructure of eukaryotic algal cell and cyanobacterial cell, economic importance of algae. Lichens, classification, thallus organization, reproduction, physiology and role in environmental pollution.

Unit-II

The characteristics and life cycles of the following:-

Cyanophyta  Nostoc, Oscillatoria  : Chlorophyta  Volvox, Hydrodictyon, Oedogonium, Chara;  Xanthophyta  Vaucheria;  Phaeophyta;  Ectocarpus
Rhodophyta  Polysiphonia

Unit – III

Bryophytes, general characters, classification, reproduction and affinities. Gametophytic and sporophytic organization of:  Bryopsida: Pogonatum;  Anthocerotopsida: Anthoceros

Unit - IV

Gametophytic and sporophytic organization of  Hepaticopsida  : Riccia, Marchantia.
B.Sc. (BOTANY)

FIRST YEAR DETAILED SYLLABUS

PAPER – 103

Diversity of Pteridophytes, Gymnosperms & Elementary Palaeobotany

Unit - I

Pteridophytes: General features, classification, stellar system and its evolution. Comparative study of morphology, anatomy, development, vegetative and reproductive systems of following: Lycopsida - Lycopodium, Selaginella; Psilopsida - Rhynia

Unit – II

General and comparative account of gametophytic and sprophytic system in Filicopsida – Sphenopsida - Equisetum. Marsilea. Heterospory and seed habit.

Unit - III

Gymnosperms: General characters, classification. Comparative study of morphology, anatomy, development of vegetative and reproductive parts in: Cycadales: Cycas

Unit – IV

Study of morphology, anatomy, development and reproductive parts in: Coniferales – Pinus; Gnetales – Ephedra Affinities and relationship of Gymnosperms, evolutionary significance. Elementary Palaeobotany: general account, types of fossils, methods of fossilization and geological time scale.
B.Sc. (BOTANY)
SECOND YEAR DETAILED SYLLABUS

PAPER – 201

Diversity of Angiosperms: Systematics, Development & Reproduction

(There will be 9 questions in each paper and candidate has to attempt only 5 questions. Q.1 will be compulsory based on units I - IV. Two questions will be set from each unit of which one question has to be attempted. All questions will carry equal marks)

Unit - I

Unit – II

Taxonomic study of following families and their economic importance: Dicots; Ranunculaceae, Papaveraeae, Malvaceae, Brassicaceae, Cucurbitaceae, Rosaceae, Leguminosaceae, Rutaceae, Apiaceae, Apocynaceae, Solanaceae, Convolvulaceae, Acanthaceae, Lamiaceae, Asteraceae, Rubiaceae, Euphorbiaceae, and Amaranthaceae. Monocots: Poaceae, Liliaceae.

Unit - III

Unit – IV
Structure and development of male and female gametophytes – microsporogenesis, microgametogenesis, megasporeogenesis, and megagametogenesis, embryo sac types. Double fertilization development of embryo, endosperm development and its morphological nature, apomixis and polyembryony.
B.Sc. (BOTANY)
SECOND YEAR DETAILED SYALLBUS
PAPER – 202

Cytology, Genetics, Evolution & Ecology

Unit - I

Cell structure, cell organelles, nucleus, chromosome structure, nucleosome and solenoid model, salivary gland, lampbrush and B chromosomes. Cell division – mitosis, meiosis; their significance, chromosomal aberrations

Unit- II

Genetics, laws of inheritance; gene interaction; linkage and; cytoplasmic inheritance; sex determination.

Unit-III

Mutation- spontaneous, induced mutations, molecular mechanism and evolutionary significance; polyploidy- origin, kinds and role in evolution. Evidences and theories of evolution.

Unit - IV

B.Sc. (BOTANY)
SECOND YEAR DETAILED SYALLBUS
PAPER – 203

Plant Physiology and Biochemistry

Unit - I

Unit - II

Photosynthesis and Chemosynthesis: photosynthetic pigments, O₂ evolution, photophosphorylation, CO₂ fixation - C₃- C₄ and CAM plants. Respiration: aerobic and anaerobic respiration, respiratory pathways glycolysis, krebs 'cycle, electron transport, oxidative phosphorylation, pentose phosphate pathway, photorespiration.

Unit - III

Unit - IV

B.Sc. (BOTANY)
THIRD YEAR DETAILED SYLLABUS

PAPER – 301

Plant Resource utilization, Palynology and Biostatistics

(There will be 9 questions in each paper and candidate has to attempt only 5 questions. Q.1 will be compulsory based on Units I - IV. Two questions will be set from each unit of which one question has to be attempted. All questions will carry equal marks)

Unit I
Centres of diversity of plants, origin of crop plants. Domestication and introduction of crop plants. Concepts of sustainable development; cultivation, production and uses of - wheat, rice, legumes, sugarcane

Unit II
A general account of plants yielding oils, spices, beverages. An account of major fiber, medicinal, petro, plants of Uttar Pradesh.

Unit III
Conservation of plants resources for agriculture and forestry. In situ conservation sanctuaries, national parks, biosphere reserves, wetlands, mangroves. Ex situ conservation; botanical gardens, field gene banks, seed banks, cryobanks.

Unit IV
An introductory knowledge to palynology, morphology, viability and germination of pollens. Classification of data, mean, median and mode. Standard deviation, standard error, variance, co-relation, $X^2$ test and experimental designs
B.Sc. (BOTANY)
THIRD YEAR DETAILED SYALLBUS
PAPER – 302

Molecular biology and Biotechnology

Unit – I
Nucleic acid as genetic material, nucleotides, structure of nucleic acids, properties of genetic code, codons assignments, chain initiation of codons mechanism of protein synthesis and its regulation.

Unit - II
Structure and properties polysaccharides, aminoacids, proteins, vitamins and harmones; Enzymes: active sites, specificity, mechanisms, factors, general aspects of enzyme kinetics. Bioenergetics: Laws of thermodynamics, concept of Gibb's free energy, high energy compounds.

Unit - III
Replication of DNA in prokaryotes and enkaryotes, gene expression and regulation. Hormonal control and second messengers Ca+, Cyclic AMP, IP$_3$ etc.

Unit- IV
Introduction to biotechnology, recombinant DNA technology, plant tissue culture, methods of gene transfer, transgenic plants, biotechnology and healthcare, microbial and environmental biotechnology.
B.Sc. (BOTANY)
THIRD YEAR DETAILED SYLLLABUS

PAPER – 303

Environmental Botany & Plant Pathology

Unit - I
Mineral resources of planet earth, Conservation of mineral resources. soils; types, properties and various problem soils; water; the source of water, physico-chemical and biological properties of water. Sustainable management of water; energy resources in India; Forests: global forest wealth, importance of forests, deforestation.

Unit - II
Environmental pollution: air, water, soil, radioactive, thermal and noise pollutions, their sources, effects and control. (Greenhouse effect, ozone depletion and acid rain). CO₂ enrichment and climate change.

Unit - III
Biodiversity and Phytogeography: biotic communities and populations, their characteristics and population dynamics. Natural vegetation of India, static and dynamic plant geography, basic principles governing geographical distribution of plants, endemism.

Unit - IV
Etiology of viral, bacterial, fungal and insect-pest diseases: mosaic diseases on tobacco, and cucumber, yellow vein mosaic of bhindi; citrus canker, potato scab, little leaf of brinjal; damping off of seedlings late blight of potato, red rot of sugarcane. Integrated pest disease management
